

Advantages When Using The Xerox 4150 Printer

The Xerox WorkCentre 4150 Printer is a competitive, multifunctional printer using quality [Xerox WorkCentre 4150 toner cartridge](#), is fully capable of handling all of your office needs. It has the capability of four different machines all in one. These capabilities include: faxing, printing, scanning, and copying. This is a very beneficial feature as it can save you both time and money.

Due to his rather small dimensions this printer has been known as a typical space saver. The exact size of the machine is 24.5 inches by 19 inches by 24 inches. This is only one of the many features this printer provides.

In order to make sure you do not need any additional accessories to attend to your printer initially, you should always know what parts are to be included upon arrival. For the Xerox WorkCentre 4150 Printer these parts include: a power cord, finisher ships with 5,000 staples, drum cartridge, [Xerox printer toners](#), and software and documentation. When your machine first arrives you should check to make sure all of these pieces have been included in your box.

A very beneficial feature to the Xerox WorkCentre 4150 Printer is that it contains a rather large screen in which to operate it. This screen is large in order to help provide better visibility. The screen is also touch for added easier operation.

One of the most important features in a feature that can set it above its competitors is its speed. This specific model is known for its excellence in speed and will not fail when compared to similar models. When printing its first page it is able to come out in a total of five seconds!

This machine is able to take on a large volume of sheets of paper in its input tray. This number maxes out at 2,100 sheets. However, when doing regular printing you will not want to run the tray to its maximum capabilities daily. This is not good for the machine and will cause it to wear quicker. Due to this you only want to fill the tray to about 600 sheets on average in the input tray.

A great added bonus of this machine is that it offers a double-sided scanning and printing feature. This feature allows for the combination of two separate sheets of paper into one combined single sheet. This is a great feature that can appeal to all because it makes for a similar handling of various files. It is also a very simple feature to learn how to use. In order to complete the usage of this double-sided feature you will simply take your first page that you wish you use and place it on the scanner. The printer will know to scan and then it will say that it is ready. After this is complete you will remove the first sheet and place your second sheet down and the same process will continue. However, after the scanning is complete this time it will begin to print into a single sheet. This is a great way in which to help reduce your paper usage over time.
